INTERNATIONAL SEARCH REPORT

Intermal Application No PCT/JP2004/014458

A. CLASSI IPC 7	FICATION OF SUBJECT MATTER H01L51/30					
According to	o International Patent Classification (IPC) or to both national classific	ation and IPC		•		
B. FIELDS	SEARCHED					
Minimum do	ocumentation searched (classification system followed by classificat $H01L$	ion symbols)				
Documenta	tion searched other than minimum documentation to the extent that	such documents are incl	uded in the fields so	earched		
	ata base consulted during the international search (name of data ba		, search terms used)		
EPO-In	ternal, WPI Data, PAJ, CHEM ABS Data	a				
C. DOCUM	ENTS CONSIDERED TO BE RELEVANT		 			
Category °	Citation of document, with indication, where appropriate, of the re-	evant passages	-	Relevant to claim No.		
х	US 6 376 105 B1 (QUINTENS DIRK E 23 April 2002 (2002-04-23)	ET AL)		17		
	claim 1; examples					
:						
Furth	ner documents are listed in the continuation of box C.	χ Patent family r	nembers are listed i	n annex.		
Special car	legories of cited documents :	*T* later document pub	lished after the Inte	mational filing date		
"A" document defining the general state of the art which is not considered to be of particular relevance "T" later document published after the international filling date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention						
"E" earlier document but published on or after the international filing date "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to						
"L" document which may throw doubts on priority claim(s) or involve an inventive step when the document is taken alone which is cited to establish the publication date of another "Y" document of particular relevance; the claimed invention						
O document referring to an oral disclosure, use, exhibition or other means *Califor be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled						
docume later th	nt published prior to the international filling date but an the priority date claimed	in the art. *&* document member	of the same patent (amily		
Date of the	actual completion of the international search	Date of mailing of the	ne international sea	ch report

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Due to the contradiction between the claimed subject matter and what has been reported in the examples, it was impossible to clearly define the extend of the claimed subject matter. Therefore the search was limited to a method of preserving an aqueous solution of Baytron P, the method being characterised by further diluting the solution with water and adjusting the pH (at 25 °C) value in the range 2,5 to 7,5.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)						
This International Search Report has not been established in respect of certain claims uncler Article 17(2)(a) for the following reasons:						
Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:						
2. X Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: see FURTHER INFORMATION sheet PCT/ISA/210						
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).						
Box III Observations where unity of invention is lacking (Continuation of Item 3 of first sheet)						
This International Searching Authority found multiple inventions in this international application, as follows:						
As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.						
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.						
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:						
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:						
Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.
